

Coating Services Now Available!

Ron Lee Construction is pleased to announce the addition of our Coating Division to our existing line of pipeline services. We have worked with some of the best in the industry to develop a state-of-the-art coating rig that has increased mobility and access capabilities vs. the competition. Our experienced team is qualified, certified, and prepared to take on any pipeline or station coating job you may have.

This division is qualified to apply aboveground painting, and underground coatings in accordance with CSA-Z245.30. We are certified by Specialty Polymer Coatings to apply the SP-2888 two-part liquid epoxy coating, and certified by Denso for their suite of tape products.

With our NACE level 1 and 2 inspectors, and a Quality Management System in compliance with ISO-9001 (2015) you can be confident any project completed for you will be done in strict adherence with all codes and regulations.

For more information on how we can meet the demands of your projects, please contact us, and we will be glad to work together!
